PROFESSIONAL SUMMARY

Product-focused Software Engineer with 2+ years owning specs, POCs and client demos for B2B and B2G location-intelligence products; awarded Excellence in IIT Roorkee's PM with Applied AI program. Skilled in user research, MVP scoping, PRDs, RICE, SQL analytics and A/B test design; known for structured, AI-first execution.

PROFESSIONAL EXPERIENCE

LocationGuru Solutions, Software Engineer (07/2025 – Present); Intern (07/2024 – 07/2025) Nagpur, Maharashtra

Hybrid product–engineering role: own specs, POCs and client demos end to end, alongside development.

- Owned RailIQ from client challenge to approval: built the POC and live demo, presented it to the client and CTO, and won approval for the full platform (now in development).
- Defined requirements for 2 products: RailIQ's 6-module FR-coded spec; Vigilo's Vision, FRS and RBAC (5 roles, P0–P2), with prototypes.
- Delivered 6+ projects in Agile/Scrum (planning, stand-ups, reviews, retros), tracking backlogs in ClickUp/OpenProject; 1,400+ merged commits.
- Partnered with sales and leadership on 3–4 proposals (Spain, UAE, Philippines, Canada) with AI-built POCs; ran a Codex → Claude Code seminar.
- Designed drill-down analytics APIs (Spring Boot, PostgreSQL/SQL) taking ops teams from city-level crowd density to zone detail; added a WORM audit trail.

ACES FORUM, Academic Coordinator (academic advising & administration) 08/2023 – 08/2024 | Nagpur

EduSkills (AICTE × Google Developers), AI-ML Virtual Intern (CNN accuracy 82% → 92%) 01/2024 – 03/2024 | Remote

Quick Heal, Cyber Warrior Intern, "Cyber Shiksha for Cyber Suraksha" CSR program (rated Excellent) 10/2022 – 02/2023 | Nagpur

PROJECTS

PHONEPE SMART SPEND COACH (CAPSTONE) | Figma | Airtable | RICE | A/B Testing Case Study | Prototype | Airtable

- Mapped 2 personas (~15–20M, ~10–12M users) with CAC (₹40–60) and 90-day retention (65–75%) estimates; found 2 market gaps.
- Owned the RICE call: a one-tap in-flow nudge (4.0) over an email digest (3.0), whose 50% confidence made impact unlikely.
- Built a 6-screen Figma prototype; persona walkthroughs found 2 high-priority issues (CTA below fold, no "why this?"), both fixed.
- Diagnosed a 5-stage funnel (40K → 2,856), prioritized the 70% insight-to-action drop by user intent; designed a 14-day A/B test.
- Set freemium decoy pricing (₹0/₹79/₹99), a referral loop and a 5-3-1 KPI dashboard (action rate, opt-outs, AI cost per user).

KAVACH: FOREIGN TOURIST SAFETY PLATFORM (0→1 POC) | Claude | Leaflet | Chart.js Live Demo

- Validated a gap via desk research: none of 6 Indian systems (112 ERSS, e-FRRO…) combine foreigner ID, embassy escalation, crowd risk.
- Mapped the traveller-to-responder journey; scoped a 3-surface MVP (SOS app, operator, admin) with a 5-state alert lifecycle.
- Set pilot success metrics (<2 min ack, <20 min resolve, 100% female-responder compliance, cost per alert) and DPDP data limits.
- Built a phased B2G roadmap (2 pilot cities → 15+) with per-city licensing; audited every market figure against government sources.

HIREMATE: AI MOCK-INTERVIEW PLATFORM (PRODUCT MANAGER) | Lovable | Supabase | Gemini Live App | GitHub

- Defined the MVP for Indian job seekers: 3 role tracks (PM, SWE, Analyst) with AI rubric scoring on clarity, structure, depth and impact.
- Designed the 4-step user journey (choose role → interview → feedback → improve) and 3-tier freemium pricing (Free / ₹499 / ₹699).
- Shipped the live app with conversion levers (waitlist, sticky mobile CTA, exit-intent offer) to test sign-up demand.

PRODUCT MANAGEMENT SKILLS

Strategy & Research: Product strategy, user research, journey mapping, market research, competitive analysis, personas, GTM, pricing
Product Execution: MVP scoping, PRDs, user stories, RICE prioritization, roadmapping, backlog management, wireframing, Agile/Scrum, OKRs
Metrics & Experimentation: Data-driven decision-making, funnel analysis, A/B test design, primary & guardrail metrics, KPI dashboards
Product Tools: Figma, Airtable, ClickUp, OpenProject, Notion, Slack, Postman, PostgreSQL (SQL), Git, GitHub
AI & No-Code: Claude Code, Claude Connectors, ChatGPT, Codex, Ollama, n8n, Google Gemini, Lovable, Supabase
Technical: Java, Spring Boot, Python, Machine Learning (TensorFlow), HTML, CSS, JavaScript, REST APIs

SOFT SKILLS

Stakeholder Communication, Structured Problem-solving, Prioritization, Cross-functional Collaboration

EDUCATION

Certification in Product Management with Applied AI, Masai School × iHUB DivyaSampark, IIT Roorkee 12/2025 – 08/2026 | Online

B.Tech, Computer Science & Engineering, Priyadarshini College of Engineering, Nagpur (RTM Nagpur University) 2020 – 2024 | Nagpur

College Topper, CSE: 1st rank in the 8th-semester RTMNU exam with a perfect 10.0 SGPA (awarded 09/2024)

CERTIFICATIONS & ACHIEVEMENTS

- **Certificate of Excellence in Evaluation** – PM with Applied AI, iHUB DivyaSampark IIT Roorkee × Masai, 08/2026 Program
- **Verified ClickUp Power User** – top 10% of users globally (roadmaps, sprints, OKRs, automation)
- **AI Ethics (MDL-220)** – IBM SkillsBuild, 09/2025 (5 of 6 toward AI Fundamentals); published an article on AI ethics
- Chief Guest speaker for CSE students at Priyadarshini College of Engineering on moving from campus to industry.
