ATHARVA DEGWEKAR

Associate Product Manager · AI & Location-Intelligence Products

+91 89569 61968 | degwekaratharva@gmail.com | Nagpur, Maharashtra | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Outcome-driven product builder with 2+ years at LocationGuru owning specs, POCs and client demos for B2B/B2G location-intelligence products, from user problem to CTO-approved build. Certificate of Excellence, IIT Roorkee PM with Applied AI; skilled in user research, MVP scoping, PRDs, RICE, SQL and experimentation.

PROFESSIONAL EXPERIENCE

LocationGuru Solutions, Software Engineer (07/2025 – Present); Intern (07/2024 – 07/2025) Nagpur, Maharashtra

Hybrid product–engineering role owning specs, POCs and client demos end to end, alongside development.

- Owned RailIQ from a client's challenge to CTO approval: framed the false-alarm problem, built an AI-assisted POC and live demo in 2–3 days, and won approval for the full platform.
- Held RailIQ's MVP scope (false alarms in, incident prevention out); designed two-tier data access for rescue vs. court-approved use.
- Defined Vigilo around its users: 5 roles (rangers, analysts as P0) in Vision, FRS and RBAC docs, plus a workflow prototype.
- Won a client over from a requested legacy-stack change to GraphQL via a working demo; saved engineering effort and improved UX.
- Shipped an explanatory insights UI for Analytica that makes heavy analytics easy to read; approved internally, still used in demos.
- Gave ops analysts zone-level answers, not city averages, via drill-down analytics APIs (Spring Boot, SQL) and a WORM audit log.
- Own a project backlog end to end (epics → features → stories, sprint goals) across 6+ Agile/Scrum projects; 1,400+ merged commits.
- Partnered with sales on 3–4 proposals, turning client problems into AI-built POCs (one became RailIQ); ran a Codex → Claude seminar.

ACES FORUM, Academic Coordinator (academic advising & administration) 08/2023 – 08/2024 | Nagpur

EduSkills (AICTE × Google Developers), AI-ML Virtual Intern (CNN accuracy 82% → 92%) 01/2024 – 03/2024 | Remote

Quick Heal, Cyber Warrior Intern, "Cyber Shiksha for Cyber Suraksha" CSR program (rated Excellent) 10/2022 – 02/2023 | Nagpur

PROJECTS

PHONEPE SMART SPEND COACH (CAPSTONE) | Figma | Airtable | RICE | A/B Testing Case Study | Prototype | Airtable

- Mapped 2 personas (~15–20M, ~10–12M users); picked the primary on willingness to pay, CAC (₹40–60) and retention (65–75%).
- Owned the RICE call: a one-tap in-flow nudge (4.0) over an email digest (3.0), whose 50% confidence made impact unlikely.
- Ran persona usability tests via an AI test runbook (errors, hesitations, quotes); fixed 2 high-priority issues (CTA, no "why this?").
- Diagnosed a 5-stage funnel (40K → 2,856); targeted the 70% insight-to-action drop with a 14-day A/B test (2,000/variant, guardrail).
- Planned post-launch ownership: weekly accuracy and AI-cost reviews, cheaper-model routing, freemium decoy pricing (₹0/₹79/₹99).

KAVACH: FOREIGN TOURIST SAFETY PLATFORM (0→1 POC) | Claude | Leaflet | Chart.js Live Demo

- Desk research: none of 6 Indian systems (112 ERSS, e-FRRO…) combine foreigner ID, embassy escalation and crowd risk.
- Mapped the traveller-to-responder journey; scoped a 3-surface MVP (SOS app, operator, admin) with a 5-state alert lifecycle.
- Set pilot success metrics (<2 min ack, <20 min resolve, 100% female-responder compliance) and cost per alert as the pricing input.
- Iterated the case after a primary-source audit (NCRB data replaced an unverified stat); phased a B2G roadmap from 2 to 15+ cities.

HIREMATE: AI MOCK-INTERVIEW PLATFORM (PRODUCT MANAGER) | Lovable | Supabase | Gemini Live App | GitHub

- Defined the MVP for Indian job seekers: 3 role tracks (PM, SWE, Analyst) with AI rubric scoring on clarity, structure, depth and impact.
- Designed the 4-step journey (role → interview → feedback → improve); shipped with Free / ₹499 / ₹699 freemium tiers.
- Ran usability tests with 4 users: fixed the video-summary scroll that blocked 2 of 4, and deprioritised low-impact colour feedback.

PRODUCT MANAGEMENT SKILLS

Strategy & Research: Product strategy, user research, usability testing, journey mapping, competitive analysis, personas, GTM, pricing
Execution: MVP scoping, PRDs, user stories, RICE, roadmapping, backlog management, Agile/Scrum, OKRs, stakeholder management
Data & Experimentation: SQL, funnel analysis, A/B test design, guardrail metrics, KPI dashboards, data-driven decision-making
Tools & AI: Figma, Airtable, ClickUp, OpenProject, Notion, Postman, Claude Code, ChatGPT, Codex, n8n, Ollama, Gemini, Lovable
Technical: Java, Spring Boot, PostgreSQL, Python, REST APIs, TensorFlow, Git

SOFT SKILLS

Stakeholder Communication, Structured Problem-solving, Prioritization, Cross-functional Collaboration

EDUCATION

Certification in Product Management with Applied AI, Masai × iHUB DivyaSampark, IIT Roorkee 12/2025 – 08/2026 | Online

B.Tech, Computer Science & Engineering, Priyadarshini College of Engineering, Nagpur (RTM Nagpur University) 2020 – 2024 | Nagpur

College Topper, CSE: 1st rank in the 8th-semester RTMNU exam with a perfect 10.0 SGPA (awarded 09/2024)

CERTIFICATIONS & ACHIEVEMENTS

- **Certificate of Excellence in Evaluation** – PM with Applied AI, iHUB DivyaSampark IIT Roorkee × Masai, 08/2026 View Program
- **Verified ClickUp Power User** – top 10% of users globally (roadmaps, sprints, OKRs, automation)
- **AI Ethics (MDL-220)** – IBM SkillsBuild, 09/2025; published an article on responsible AI Read Article
- Chief Guest speaker for CSE students at Priyadarshini College of Engineering on moving from campus to industry.
