PROFESSIONAL SUMMARY

Product-focused Software Engineer with 2+ years building B2B and B2G location-intelligence products, awarded Excellence in Evaluation in IIT Roorkee's PM with Applied AI program. Skilled in user research, PRDs, RICE prioritization, Figma prototyping, funnel analysis and A/B testing; known for structured, AI-first execution.

PROFESSIONAL EXPERIENCE

LocationGuru Solutions, Software Engineer (07/2025 – Present); Intern (07/2024 – 07/2025) Nagpur, Maharashtra

- Turned a client challenge into a working RailIQ POC and live demo (mobile-network train-location verification for a European rail operator); built the end-to-end web platform, now CTO-approved and in development.
- Wrote RailIQ's 6-module, FR-coded product spec, and Vision, FRS and RBAC specs (5 roles, P0–P2) plus a prototype for Vigilo, a sensor-free park-monitoring product.
- Delivered across 6+ projects in an Agile/Scrum team (sprint planning, stand-ups, reviews, retros) tracked in ClickUp and OpenProject; 1,400+ merged commits.
- Shaped 3–4 client proposals (Spain, UAE, Philippines, Canada) using AI tools to frame the problem and build POCs; ran an internal Codex → Claude Code seminar.
- Built Java/Spring Boot and PostgreSQL services for SmartGeo crowd analytics, including drill-down APIs and a WORM audit trail.

ACES FORUM, Academic Coordinator (academic advising & administration) 08/2023 – 08/2024 | Nagpur

EduSkills Foundation (AICTE × Google Developers), AI-ML Virtual Intern (10 weeks) 01/2024 – 03/2024 | Remote

- Raised Fashion-MNIST CNN accuracy from 82% to 92% with batch normalization, dropout and augmentation; cut loss by 12% via tuning.

Quick Heal, Cyber Warrior Intern, "Cyber Shiksha for Cyber Suraksha" CSR program (rated Excellent) 10/2022 – 02/2023 | Nagpur

PROJECTS

PHONEPE SMART SPEND COACH (CAPSTONE) | Figma | Airtable | RICE | A/B Testing Case Study | Prototype | Airtable

- Defined 2 personas (~15–20M and ~10–12M users) and benchmarked 6 features against competitors, finding 2 market gaps.
- Prioritized 4 ideas using RICE; selected a real-time, one-tap in-flow nudge (score 4.0 vs 3.0 runner-up) over an email digest.
- Designed a 6-screen Figma prototype with a reusable NudgeCard component; usability walkthroughs surfaced 2 high-priority issues.
- Diagnosed a 5-stage funnel (40K → 2,856 users), prioritized the 70% insight-to-action drop and designed a 14-day A/B test.
- Proposed freemium decoy pricing (₹0 / ₹79 / ₹99), a referral growth loop and a 5-3-1 KPI dashboard for leadership.

KAVACH: FOREIGN TOURIST SAFETY PLATFORM (0→1 POC) | Claude | Leaflet | Chart.js Live Demo

- Validated a gap: none of 6 Indian systems (112 ERSS, e-FRRO, etc.) combine foreigner ID, embassy escalation and crowd risk.
- Designed a 3-surface POC (traveller SOS app, operator console, admin console) with a 5-state alert lifecycle and nearest-unit dispatch.
- Defined pilot SLAs (<2 min acknowledge, <20 min resolve, 100% female-responder compliance) and a DPDP-aligned data boundary.
- Built a B2G go-to-market plan scaling from 2 pilot cities to 15+; audited every market figure against primary government sources.

HIREMATE: AI MOCK-INTERVIEW PLATFORM (PRODUCT MANAGER) | Lovable | Supabase | Gemini Live App | GitHub

- Scoped 3 role tracks (PM, SWE, Analyst) with AI rubric scoring on clarity, structure, depth and impact for Indian job seekers.
- Designed a 4-step journey (choose role → interview → feedback → improve) and 3-tier freemium pricing (Free / ₹499 / ₹699).
- Shipped the live landing page and app with waitlist, sticky mobile CTA and exit-intent offer to lift sign-up conversion.

PRODUCT MANAGEMENT SKILLS

Strategy & Research: Product strategy, user research, market research, competitive analysis, personas, GTM strategy, pricing & packaging
Product Execution: PRDs, user stories (INVEST), RICE prioritization, roadmapping, wireframing, FRS, Agile/Scrum ceremonies, OKRs
Metrics & Experimentation: Data-driven decision-making, funnel analysis, A/B test design, primary & guardrail metrics, KPI dashboards
Product Tools: Figma, Airtable, ClickUp, OpenProject, Notion, Slack, Postman, PostgreSQL (SQL), Git, GitHub
AI & No-Code: Claude Code, Claude Connectors, ChatGPT, Codex, Ollama, n8n, Google Gemini, Lovable, Supabase
Technical: Java, Spring Boot, Python, Machine Learning (TensorFlow), HTML, CSS, JavaScript, REST APIs

SOFT SKILLS

Stakeholder Communication, Structured Problem-solving, Prioritization, Cross-functional Collaboration

EDUCATION

Certification in Product Management with Applied AI, Masai School × iHUB DivyaSampark, IIT Roorkee 12/2025 – 08/2026 | Online
B.Tech, Computer Science & Engineering, Priyadarshini College of Engineering, Nagpur (RTM Nagpur University) 2020 – 2024 | Nagpur
College Topper, CSE: 1st rank in the 8th-semester RTMNU exam with a perfect 10.0 SGPA (awarded 09/2024)

CERTIFICATIONS & ACHIEVEMENTS

- **Certificate of Excellence in Evaluation** – PM with Applied AI, iHUB DivyaSampark IIT Roorkee × Masai, 08/2026 Program
- **Verified ClickUp Power User** – top 10% of users globally (roadmaps, sprints, OKRs, automation)
- **AI Ethics (MDL-220)** – IBM SkillsBuild, 09/2025 (5 of 6 toward AI Fundamentals); published an article on AI ethics
- Chief Guest speaker, CSE Dept., Priyadarshini College of Engineering; side builds: JARVIS (Ollama) and n8n + Gemini automation.
